Thurston County, WA Watershed Characterization Studies: Using BIBI Data to Inform Land-use Decisions

Presented By:

Ann Marie Finan

Education and Outreach Specialist

Thurston County Resource Stewardship

Water Resources - Stormwater Utility

Goals of Watershed Characterization Studies

- •Assess the current condition of ecological processes in Thurston County's watersheds
- •Develop a prioritized list of natural resource sites (wetland, riparian, and floodplain)
- •Identify avoidance and minimization, preservation, restoration, mitigation, to restore hydrologic function
- •A watershed based approach to water management?

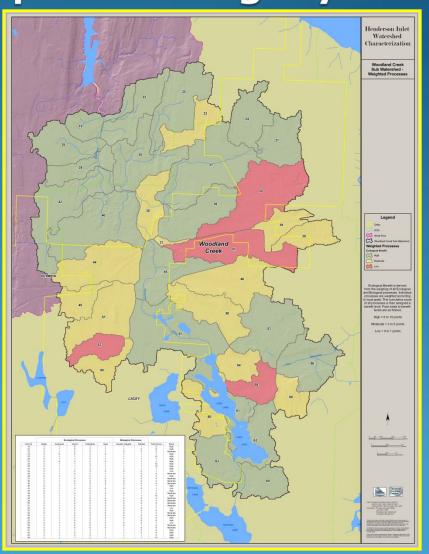

BIBI Data is one of Three Indicators Used to Assess Aquatic Integrity

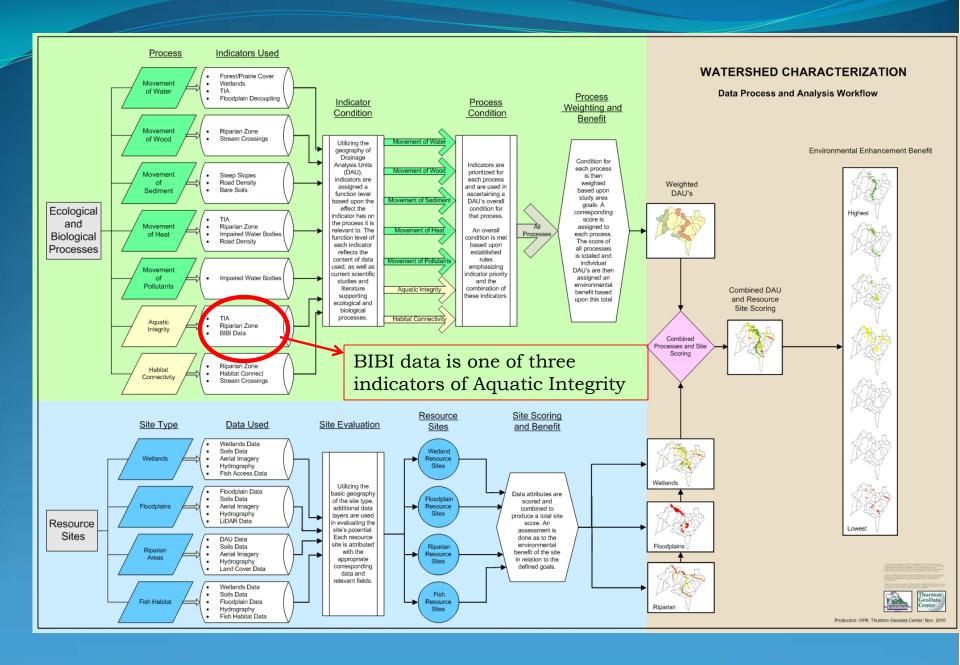

Ecological Processes

- Movement of Water
- Movement of Wood
- Movement of Sediment
- Movement of Heat
- Movement of Pollutants

Biological Indicators

- Aquatic Integrity
 - 1)TIA
 - 2)Riparian Zone
 - 3)BIBI Data
- Habitat Connectivity
