| Un-Assigned Called the state of | 70         |            |
| Substrategies  |            |            |
|  |            |            |
| SI   |            | SI Focused |
| Stormwater   |            | 7          |
| Habitat  |            | 15         |
| Shellfish  |            | 8          |

## Implementation Strategies

#### Purpose

Define and document the mechanisms and causal pathways by which specific recovery targets are expected to be met.

Articulate the types of actions that need to be taken to achieve a given recovery target.

Specify the parties and resources needed to carry out these actions.

### Implementation Strategies

#### Schedule

2<sup>nd</sup> review of test cases: Shellfish, Estuaries targets May 19
